Zunaid Ahmed

Senior Product Designer · Hyderabad, Telangana, India · xunayd786@gmail.com · +91-8827786644 · linkedin.com/in/zunaidahmed786 · zunaidxdesign.vercel.app

SUMMARY

UI/UX and Product Designer with 6+ years designing enterprise web, Android and SaaS applications for data-heavy, workflow-driven environments. Strong in UX research, interaction design, information architecture, prototyping and high-fidelity visual design in Figma, with hands-on design-system, WCAG 2.1 AA and responsive/adaptive design experience across screen sizes. Work closely with product owners, developers, QA and global client stakeholders, and deliver developer-ready specs backed by API-aware handoffs (REST, OpenAPI, Postman). Also build AI-assisted design tooling, including an AI UX agent that produces native Figma designs.

EXPERIENCE

Senior UX Designer, LTIMindtree (on payroll of People Prime Worldwide) Hyderabad · Mar 2026 – Jul 2026

- Led end-to-end UX for Topcon Corporation's native Android app: user research inputs, journeys, information architecture, wireframes, Figma prototypes and production-ready UI for construction surveying and geospatial workflows.
- Designed touch-first, adaptive layouts using Material Design 3 and platform patterns for field use, with simplified navigation and low-cognitive-load interactions that improved task efficiency.
- Built scalable design systems, component libraries and design-token architecture; produced developer-ready specs to speed up implementation and keep UI consistent.
- Ran usability testing, heuristic evaluations and design reviews, applying accessibility best practices (WCAG 2.1 AA) to fix usability issues.
- Led A/B testing with Figma, Maze and analytics, achieving a 23% increase in task completion rates.
- Collaborated daily with Product Managers, Japanese client stakeholders, developers and QA in an Agile delivery model.
- Built an AI-native design system and integrated AI-assisted tools into ideation, prototyping, documentation and designer–developer collaboration.

Marketing Creative Designer (UX for SaaS modules), Biva.AI Hyderabad · Apr 2022 – Jan 2026

- Directed end-to-end UX for SaaS modules including analytics and reporting, turning complex business requirements into clear user flows, wireframes, interactive prototypes and high-fidelity designs.
- Designed enterprise dashboards, workflow-driven interfaces and decision-support experiences for data-intensive environments.
- Built design systems, reusable components and documentation to improve consistency across responsive web experiences.
- Designed around REST API-driven data, mapping endpoints, request/response structures and error states into loading, empty and validation UI states.
- Reviewed OpenAPI/Swagger docs with engineers using Postman to align flows and front-end behavior before handoff.
- Partnered with product managers, engineers and business stakeholders; used AI-powered workflows to speed up ideation and iteration.

UI Designer, Saras Analytics Hyderabad · Jun 2020 – Mar 2022

- Designed enterprise data platforms, reporting interfaces and workflow-centric applications used by global ecommerce brands.
- Conducted user research, usability testing, heuristic evaluations and prototype validation.
- Developed interaction patterns and visualization frameworks for complex business workflows.
- Partnered with product and engineering to improve navigation and usability, reducing support tickets by 28%.

PROJECTS

TriallQ AI · Independent · trialiq-ai.vercel.app Jul 2026 – Present

- Designed a 0→1 AI-native, workflow-driven platform that helps clinical trial coordinators screen participant eligibility faster without blindly trusting an AI verdict.
- Unified protocol documentation, participant eligibility details and real-time safety signals in one workspace to simplify decision-making.

UX Direct (AI UX design agent for Figma) · Independent 2026 – Present

- Building an AI UX designer, delivered as a Figma plugin, that creates native Figma designs, preserves source content and iterates through objective quality checks to cut manual correction.
- Designing the human-AI workflow, quality criteria and design-system rules the agent follows; versioned on GitHub.

SKILLS

UX research & strategy: User research, interviews, usability testing, heuristic evaluation, design thinking, information architecture, user flows, product analytics, A/B testing (Maze)

Design & prototyping: Figma, FigJam, wireframing, interactive prototyping, high-fidelity UI, interaction design, responsive and adaptive design, Adobe XD, Sketch, InVision, Adobe Creative Suite, Miro

Platforms: Enterprise web applications, Android (Material Design 3), data-heavy dashboards and reporting, workflow-driven tools, field-use and low-cognitive-load UI

Design systems: Design tokens, component libraries, documentation, developer-ready specs and handoff; Material Design and custom systems

Accessibility: WCAG 2.1 AA, keyboard navigation, focus states, color contrast validation, inclusive design

Collaboration: Agile/Scrum workflows, stakeholder management, client workshops, requirements gathering, cross-functional work with product, engineering and QA, Jira

Front-end awareness: HTML5, CSS3, JavaScript, React, Next.js, Tailwind, component-based design, REST API, OpenAPI/FastAPI, Postman, PostgreSQL, GitHub, deployment on Vercel and Cloudflare

AI-powered design: Figma Make, Claude Design, Claude, Claude Code, ChatGPT, GitHub Copilot, prompt-based prototyping, AI-assisted UX workflows, human-AI interaction design, Figma plugin and agent workflows

EDUCATION

- **B.Tech, Computer Science Engineering**, Jaypee University of Engineering and Technology, Guna, Madhya Pradesh · 2020
- **12th (CBSE)**, Delhi Public School, Vijaipur · 2016
- **10th (CBSE)**, Delhi Public School, Vijaipur · 2014
