SUMMARY

AI-native Senior Product Designer with 6+ years of experience designing enterprise applications, Android products, SaaS platforms, and workflow-driven experiences. Builds the design tooling as well as the designs: creator of UX Direct, an AI UX agent delivered as a Figma plugin that produces native Figma designs and checks its own work against objective quality criteria. Specialized in human-AI interaction, design agents, automated design workflows, design systems, and complex enterprise UX. Experienced in collaborating directly with global clients, product teams, and engineers to turn business challenges into intuitive experiences, backed by usability testing, WCAG 2.1 AA accessibility, REST/OpenAPI-aware handoffs, and Postman-based API validation. Hands-on with Claude, Claude Code, Claude Design, Figma Make, and GitHub Copilot to accelerate exploration, prototyping, documentation, and developer collaboration.

EXPERIENCE

Senior UX Designer | LTIMindtree - On payroll of People Prime Worldwide

March 2026 - July 2026, Hyderabad

- Led end-to-end UX design for Topcon Corporation's native Android mobile application, defining user journeys, information architecture, wireframes, Figma prototypes, and production-ready interfaces for construction surveying and geospatial workflows.
- Designed native Android experiences using Material Design 3, adaptive layouts, touch-first interactions, and platform-specific patterns, with simplified navigation and low-cognitive-load interactions for field use.
- Built scalable design systems, reusable components, component libraries, and design token architecture to ensure consistency and accelerate product development.
- Built an AI-native design system and optimized design workflows by integrating AI-assisted tools into ideation, prototyping, documentation, and designer–developer collaboration, accelerating delivery while maintaining design quality.
- Improved usability through WCAG 2.1 AA accessibility practices, usability testing, heuristic evaluations, and design reviews.
- Collaborated with Product Managers, Japanese client stakeholders, developers, and QA teams throughout the product lifecycle.
- Led A/B testing initiatives using Figma, Maze, and analytics platforms, achieving a 23% increase in task completion rates.

Marketing Creative Designer | Biva.AI

April 2022 - January 2026, Hyderabad

- Directed end-to-end UX design for SaaS modules including analytics and reporting, translating complex business needs into user flows, wireframes, interactive prototypes, and high-fidelity designs.
- Designed enterprise dashboards, workflow-driven interfaces, and decision-support experiences for data-intensive environments.
- Built scalable design systems, reusable components, and documentation frameworks to improve product consistency.
- Designed SaaS interfaces around REST API-driven data, mapping endpoints, request/response structures, and error states into clear loading, empty, and validation UI states.
- Reviewed OpenAPI/Swagger documentation with engineers using Postman to align user flows, data requirements, and front-end behavior before handoff.
- Used AI-powered design workflows to accelerate ideation, content generation, and design iteration cycles.

UI Designer | Saras Analytics

June 2020 - March 2022, Hyderabad

- Designed enterprise data platforms, reporting interfaces, and workflow-centric applications used by global ecommerce brands.
- Conducted user research, usability testing, heuristic evaluations, and prototype validation; developed interaction patterns and visualization frameworks for complex business workflows.
- Partnered with product and engineering teams to improve navigation and usability, reducing support tickets by 28%.

PROJECTS

UX Direct | AI UX design agent for Figma · Independent

2026 - Present

- Building UX Direct, an AI UX designer delivered as a Figma plugin that creates native Figma designs, preserves source content, and iterates through objective quality checks to cut manual correction.
- Designed the human-AI workflow, quality criteria, and design-system rules the agent follows, with human approval before changes are written to the canvas; paired with a UX intelligence layer for site audits, benchmarking, and information-architecture proposals. Versioned on GitHub.

TrialIQ AI | **Independent**

trialiq-ai.vercel.app, July 2026 - Present

- Designed TrialIQ AI, a 0 → 1 AI-native platform that helps clinical trial coordinators screen participant eligibility faster, without asking them to blindly trust an AI's verdict.
- Unified protocol documentation, participant eligibility details, and real-time safety signals in one workspace to simplify decision-making.

EDUCATION

B.Tech, Computer Science Engineering | **Jaypee University of Engineering and Technology**

Guna, Madhya Pradesh, 2020

12th / Inter - CBSE | **Delhi Public School, Vijaipur**

Vijaipur, Madhya Pradesh, 2016

10th - CBSE | **Delhi Public School, Vijaipur**

Vijaipur, Madhya Pradesh, 2014

SKILLS

AI-Native Design: Design Agents • Figma Plugin & Agent Workflows • UX Intelligence Systems • Automated Design Workflows • Human-AI Interaction Design • Claude • Claude Code • Claude Design • Figma Make • ChatGPT • GitHub Copilot • Prompt-Based Prototyping • AI-Assisted UX Workflows • Design Automation

UX & UI Design: User Experience Design • User Interface Design • Interaction Design • Information Architecture • User Flows • Wireframing • Prototyping • High-Fidelity UI Design • Responsive Design • Mobile UX • Android UX • Design Systems • Design Tokens • Component Libraries • Visual Hierarchy • Design Thinking

Platform & Experience Design: Android Application Design • Desktop Application Design • Enterprise Application Design • Workflow-Driven UX • Data-Heavy Interfaces • Field-Use Interface Design • Low-Cognitive-Load UI

Accessibility & Usability: Accessibility (WCAG 2.1 AA) • Keyboard Navigation • Focus State Management • Color Contrast Validation • Inclusive Design • Usability Testing • Heuristic Evaluation • User Research • User Interviews

Front-End & Technical Skills: HTML5 • CSS3 • JavaScript • React • Next.js • Tailwind • REST API • OpenAPI • FastAPI • Postman • PostgreSQL • GitHub • Vercel • Cloudflare • Design-to-Development Handoff

Tools & Technologies: Figma • FigJam • Adobe XD • Sketch • InVision • Adobe Creative Suite • Jira • Miro • Maze

Collaboration & Product Skills: Stakeholder Management • Client Workshops • Requirements Gathering • Cross-Functional Collaboration • Agile Workflows • Product Strategy • Design Iteration • Product Analytics • A/B Testing • Developer Collaboration
