SUMMARY

Senior Product Designer with 6+ years of experience designing enterprise applications, Android products, SaaS platforms, and workflow-driven experiences. Specialized in Figma-based product design, AI-native product design, design systems, human-AI interaction, complex workflows, and scalable UX architecture. Experienced in collaborating directly with global clients, product teams, and engineers to translate business challenges into intuitive user experiences. Strong expertise in Figma, AI-assisted design workflows, design tokenization, usability testing, interaction design, scalable design systems, REST API-driven UX collaboration, FastAPI/OpenAPI documentation understanding, and Postman-based API validation for design handoff. Proven track record of leveraging AI tools such as Figma Make, Claude Design, and GitHub Copilot to accelerate design exploration, prototyping, documentation, and developer collaboration.

EXPERIENCE

Senior UX Designer | LTIMindtree

March 2026 - July 2026, Hyderabad

- Led end-to-end UX design for Topcon Corporation's native Android mobile application, defining user journeys, information architecture, wireframes, Figma prototypes, and production-ready interfaces for construction surveying and geospatial workflows.
- Designed intuitive native Android mobile experiences using Material Design 3, adaptive layouts, touch-first interactions, and platform-specific design patterns.
- Built scalable design systems, reusable components, component libraries, and design token architecture to ensure consistency and accelerate product development.
- Improved product usability through accessibility best practices, WCAG 2.1 AA, usability testing, heuristic evaluations, design reviews, and iterative design enhancements.
- Collaborated with Product Managers, Japanese client stakeholders, developers, and QA teams to deliver high-quality mobile experiences throughout the product lifecycle.
- Built an AI-native design system and optimized design workflows by integrating AI-assisted tools into ideation, prototyping, documentation, and designer–developer collaboration, accelerating delivery while maintaining design quality.
- Optimized field workflows through simplified navigation and low-cognitive-load interaction patterns, improving operational efficiency and task completion.
- Led A/B testing initiatives using Figma, Maze, and analytics platforms, achieving a 23% increase in task completion rates and driving data-informed product improvements.

Marketing Creative Designer | Biva.AI

April 2022 - January 2026, Hyderabad

- Directed end-to-end UX design for diverse SaaS modules including analytics and reporting, translating complex business needs into intuitive user experiences.
- Designed enterprise dashboards, workflow-driven interfaces, and decision-support experiences for data-intensive environments.
- Built scalable design systems, reusable components, and documentation frameworks to improve product consistency.
- Collaborated with product managers, engineers, and business teams to transform complex requirements into intuitive user experiences.
- Utilized AI-powered design workflows to accelerate ideation, content generation, and design iteration cycles.
- Validated design concepts and drove user adoption by creating interactive prototypes and comprehensive user flows for enterprise SaaS applications.
- Designed SaaS interfaces around REST API-driven data, mapping endpoints, request/response structures, and error states into clear loading, empty, and validation UI states.
- Reviewed OpenAPI/Swagger documentation with engineers using Postman to align user flows, data requirements, and front-end behavior before handoff.

UI Designer | Saras Analytics

June 2020 - March 2022, Hyderabad

- Designed enterprise data platforms, reporting interfaces, and workflow-centric applications used by global ecommerce brands.
- Conducted user research, usability testing, heuristic evaluations, and prototype validation.
- Developed scalable interaction patterns and visualization frameworks for complex business workflows.
- Partnered with product and engineering teams to improve usability, navigation, and overall product experience.
- Reduced support tickets by 28% through UX improvements and workflow optimization.

PROJECT

TrialIQ AI | Independent

July 2026 - Present

- Designed TrialIQ AI, a 0→1 AI-native platform that helps clinical trial coordinators screen participant eligibility faster — without asking to blindly trust an AI's verdict.

- Unified protocol documentation, participant eligibility details, and real-time safety signals within a consolidated TrialIQ AI workspace to simplify decision-making for clinical trial coordinators.

EDUCATION

B.Tech, Computer Science Engineering | **Jaypee University of Engineering and Technology**
Guna, Madhya Pradesh, 2020

12th / Inter - CBSE | **Delhi Public School, Vijaipur**
Vijaipur, Madhya Pradesh, 2016

10th - CBSE | **Delhi Public School, Vijaipur**
Vijaipur, Madhya Pradesh, 2014

SKILLS

UX & UI Design: User Experience Design • User Interface Design • Interaction Design • Information Architecture • User Flows • Wireframing • Prototyping • High-Fidelity UI Design • Responsive Design • Mobile UX • Android UX • Design Systems • Design Tokens • Component Libraries • Visual Hierarchy • Design Thinking
Platform & Experience Design: Android Application Design • Desktop Application Design • Enterprise Application Design • Workflow-Driven UX • Data-Heavy Interfaces • Field-Use Interface Design • Low-Cognitive-Load UI • Enterprise Workflow Design
Accessibility & Usability: Accessibility (WCAG 2.1) • Keyboard Navigation • Focus State Management • Color Contrast Validation • Inclusive Design • Usability Testing • Heuristic Evaluation • User Research • User Interviews
Front-End & Technical Skills: HTML5 • CSS3 • JavaScript • REST API • FastAPI • OpenAPI • Postman • Responsive UI Design • Front-End Development Awareness • Design-to-Development Handoff • React • Next.js • Tailwind • PostgreSQL
AI-Powered Design: Figma Make • Claude Design • GitHub Copilot • AI Usage • AI-Assisted UX Workflows • Design Automation • Prompt-Based Prototyping • AI-Native Product Design
Tools & Technologies: Figma • FigJam • Adobe XD • Sketch • InVision • Adobe Creative Suite • Jira • Miro • Postman
Collaboration & Product Skills: Stakeholder Management • Client Workshops • Requirements Gathering • Cross-Functional Collaboration • Agile Workflows • Product Strategy • Design Iteration • Product Analytics • A/B Testing • Customer Success Collaboration • Problem Solving • Developer Collaboration
