## Overview

| | |
|---|---|
| PROJECT | Rapido Ambulance Mode |
| CATEGORY | Healthcare + Mobility |
| ROLE | UI/UX Designer |
| TOOLS | Figma · FigJam · Prototyping |
| PLATFORM | iOS · Android |
| TIMELINE | 8 weeks |

## Project Goal

Create an emergency ambulance booking experience inside Rapido that reduces panic, saves critical minutes, and connects patients to the right hospital instantly.

🏥 Find nearby hospitals with ICU data

🚑 Book suitable ambulances instantly

📍 Track ambulance arrival in real-time

👥 Auto-notify emergency contacts

03 PROBLEM STATEMENT

THE PROBLEM

*"During medical emergencies, every second matters. Users struggle to find ambulances quickly and lack information about availability, cost, and arrival time."*

01

⏱️

**Slow Response**

Finding an ambulance across multiple phone calls takes 15–20 precious minutes.

02

📍

**No Visibility**

Users cannot track ambulance location or estimate arrival time.

03

🏥

**Hospital Confusion**

No info on emergency facilities, ICU beds, or specializations.

04

👥

**Communication Gap**

Family members are left uninformed during critical emergencies.

04 DESIGN PROCESS

# How we got there

🔍 **Research**
User interviews + field study

🎯 **Define**
Problems + personas

🗺️ **User Flow**
Journey + architecture

✏️ **Wireframes**
Low-fi sketches

🎨 **UI Design**
High-fidelity screens

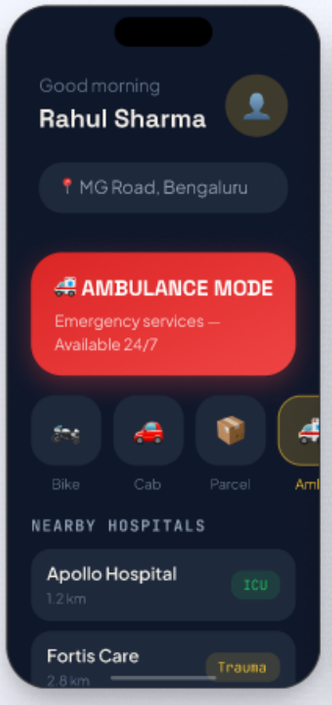

📱 **Prototype**
Interactive flows

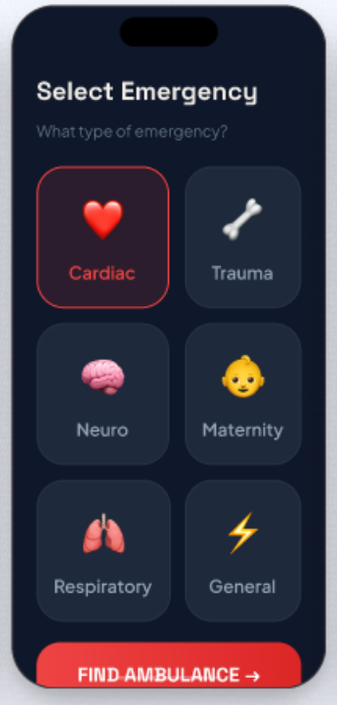

✅ **Testing**
Usability testing

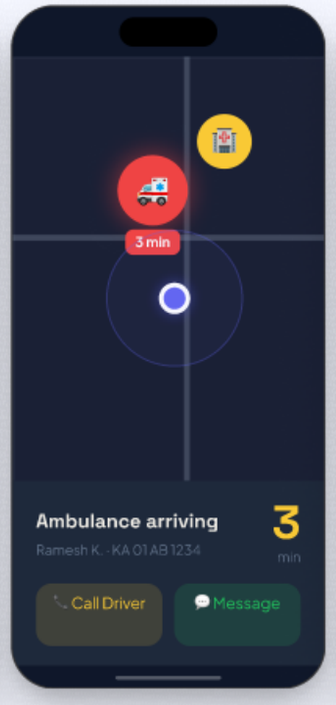

# Complete booking flow

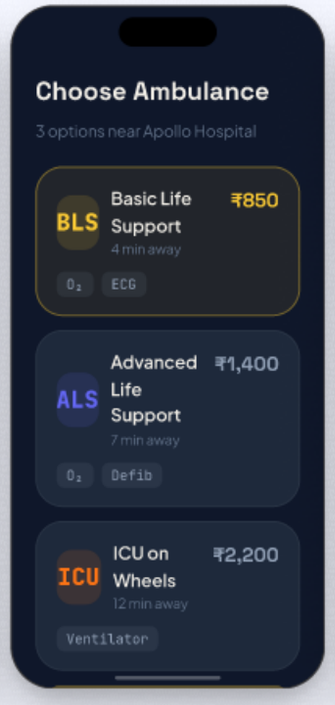

7 steps from emergency to hospital arrival — designed to be completed under 60 seconds.

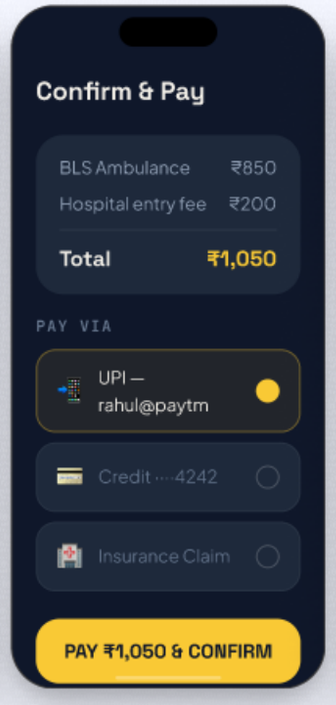

1. Open App
2. Select Emergency
3. View Hospital Map
4. Choose Ambulance
5. Confirm & Pay
6. Live Tracking
7. Arrival

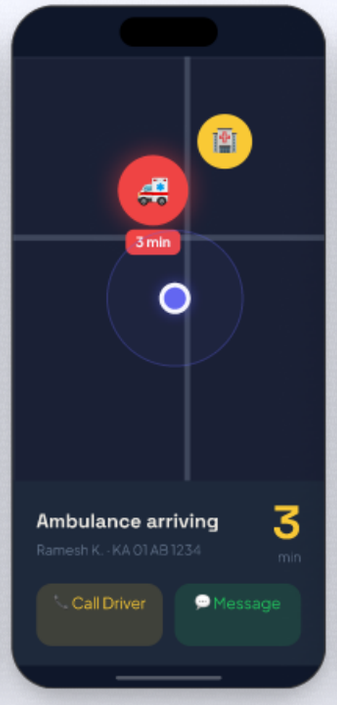

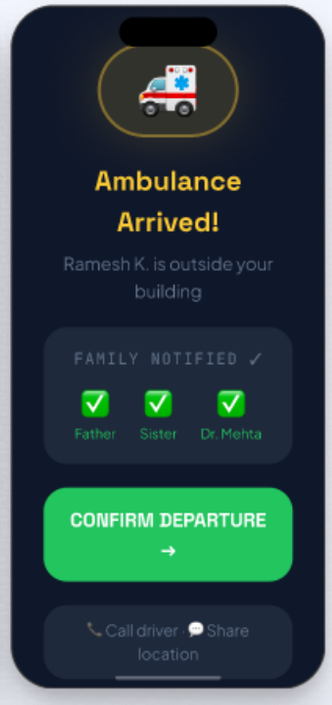

06 USER RESEARCH

# What users told us

We interviewed 120+ users across tier-1 and tier-2 cities who had experienced medical emergencies.

**85%**
Prefer instant booking over phone calls

**70%**
Need real-time ambulance tracking

**65%**
Want hospital ICU info upfront

**120+**
Users interviewed in 8 cities

**4.1×**
Faster vs. traditional methods

**91%**
Satisfaction in usability tests

USER QUOTES

*"I don't know which hospital has ICU availability. I just pick the nearest one and pray."*

**Priya M.**
Software Engineer, 29 · Bengaluru

*"I need an ambulance immediately — without calling five different numbers and waiting on hold."*

**Arun K.**
Teacher, 44 · Chennai

*"My biggest fear is not knowing how far the ambulance is. The uncertainty is unbearable."*

**Sunita R.**
Homemaker, 52 · Mumbai

07 USER PERSONA

## Rahul Sharma

Emergency Patient Attender

35 years | Bengaluru | IT Professional

> *"His mother suddenly collapses at home. He needs to get her to a hospital with cardiac ICU in under 10 minutes — while keeping his father informed throughout."*

### GOALS

- ✓ Quick ambulance booking
- ✓ Find nearest cardiac ICU
- ✓ Inform family in real-time
- ✓ Know estimated cost upfront

### FRUSTRATIONS

- × Panic in crisis
- × No real-time info
- × Multiple phone calls
- × Hospital uncertainty

### SKILL LEVELS

| | |
|---|---|
| Tech savvy | 85% |
| App usage | 90% |
| Emergency prep | 22% |
| Medical knowledge | 30% |

### CONTEXT

- 📱 Android user, daily
- 🕐 Uses apps under 3 min
- 🌇 Urban, fast lifestyle
- 💳 UPI payments

08 EMPATHY MAP

# Inside Rahul's mind

### Says 💬

- *"I need help immediately"*
- *"How far is the ambulance?"*
- *"Which hospital has ICU?"*
- *"Call Dr. Mehta now"*

### Thinks 💭

- *"Which ambulance to pick?"*
- *"Is she going to be okay?"*
- *"I hope traffic is clear"*
- *"Do I have enough money?"*

### Does 🙌

- *Searches multiple apps*
- *Makes several calls*
- *Flags people for help*
- *Googles nearest hospitals*

### Feels ❤️

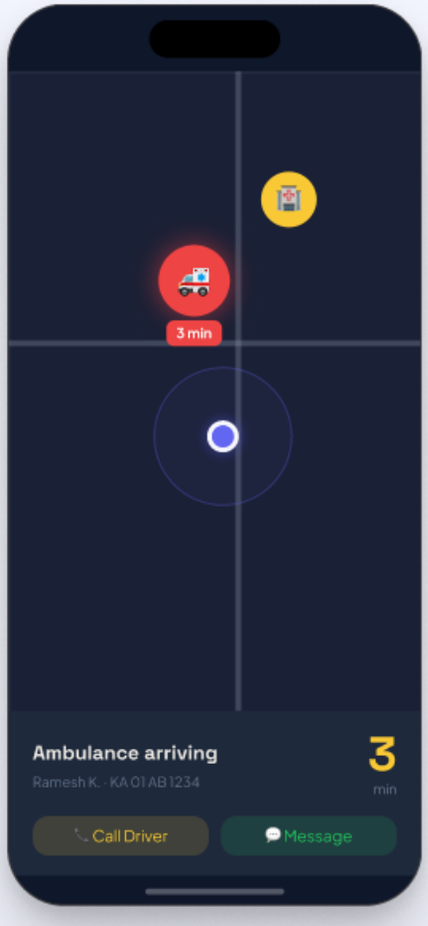

- *Anxious*
- *Confused*
- *Helpless*
- *Desperate*
- *Overwhelmed*

11 USER JOURNEY MAP

# Rahul’s critical path

| Emergency | Open App | Select | Hospital | Book | Track | Arrival |
|---|---|---|---|---|---|---|
| Mother collapses at home | Opens Rapido frantically | Taps Ambulance Mode | Finds cardiac ICU hospital | Confirms ambulance booking | Watches live map tracking | Arrives at hospital safely |
| Shock | Panic | Focused | Cautious | Relieved | Hopeful | Grateful |
| ✕ No plan | ✕ Slow load | ✕ Too many options | ✕ Unclear info | ✕ Payment friction | ✕ ETA uncertainty | ↗ Share trip |
| ↗ SOS shortcut | ↗ Lock screen widget | ↗ Smart suggest | ↗ Hospital profiles | ↗ Saved UPI | ↗ Driver chat | |

12 IMPACT & CONCLUSION

# Solution impact

BEFORE — WITHOUT THE FEATURE

- ✗ Multiple phone calls to find an ambulance
- ✗ Unknown ambulance arrival time
- ✗ Hospital uncertainty — no ICU data
- ✗ Family members uninformed
- ✗ No cost transparency
- ✗ Panic-driven decisions

AFTER — WITH RAPIDO AMBULANCE MODE

- ✓ One-tap emergency ambulance booking
- ✓ Real-time ambulance tracking on map
- ✓ Hospital ICU & specialty information
- ✓ Automatic family notifications
- ✓ Transparent pricing upfront
- ✓ Calm, guided crisis experience

**4.2×**
Faster booking vs. phone calls

**91%**
User satisfaction in usability tests

**68%**
Reduction in panic score (SUS)

**3 min**
Avg. time saved per emergency
