Virtual Card Case Study

By Zunaid Ahmed

Problem Statement

An accountant needs to create virtual cards, assign them to employees within an organisation and also track their expenses.

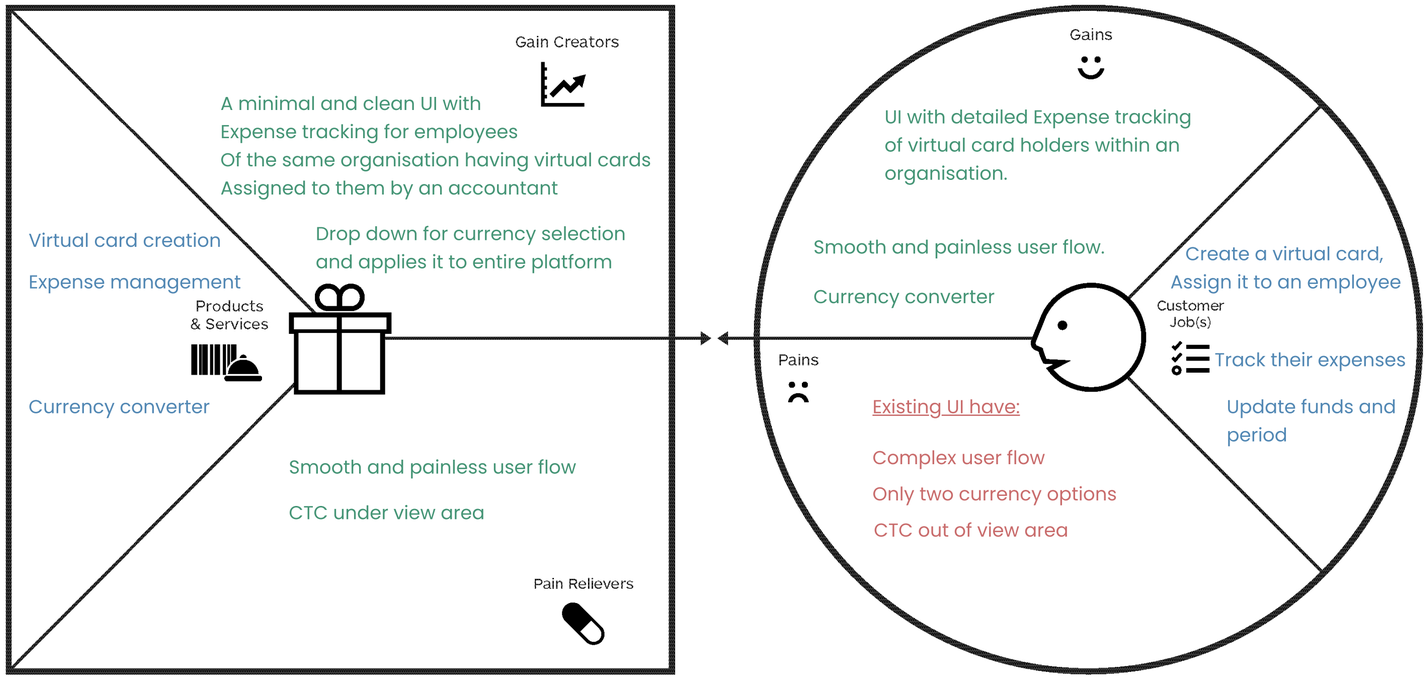

User Profiles

Accountant

Accountant of an organisation who don’t have much technical knowledge.

Empathy Map

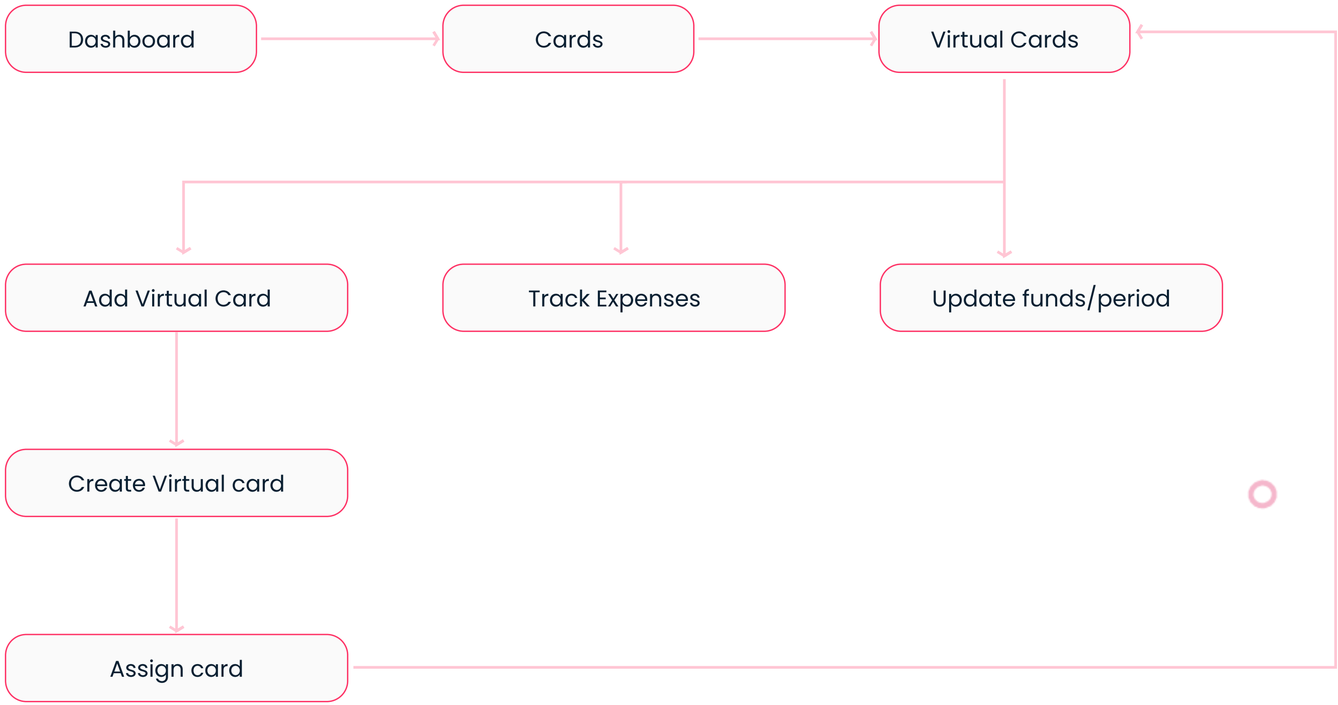

Solution

A minimal UI with very smooth and painless interaction for an organisation planning to assign virtual cards to their employees.

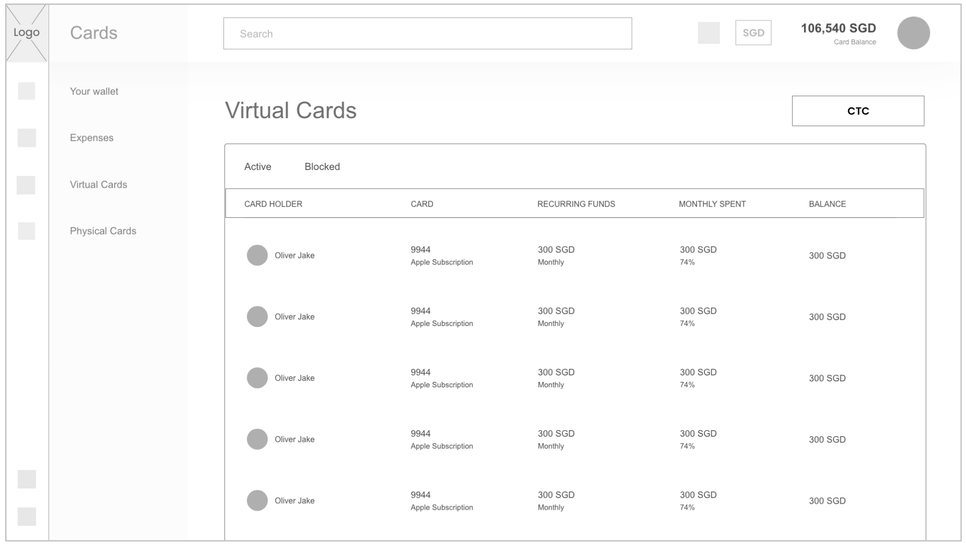

UI will make expenses tracking easy and simple.

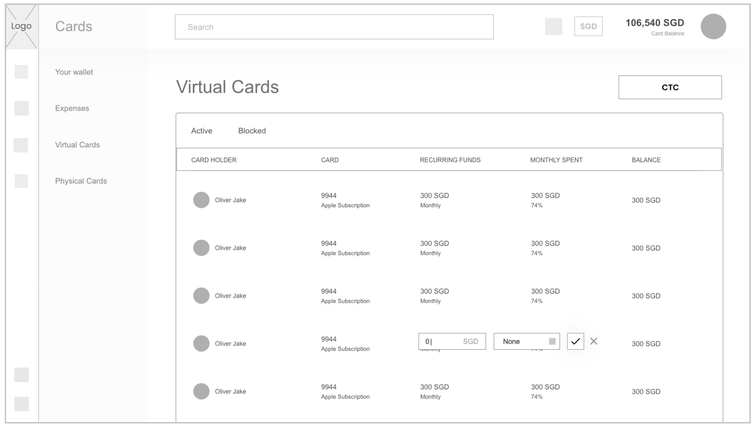

UI will use the space and content wisely to inform us as it could about this new feature in the easiest way possible.
